

Experienced Design Engineering
Accurate Manufacturing
Global Procurement

OKAMURA CO., LTD.

company profile

<http://www.okamura-industry.co.jp>

Technology network between people and technology

We will do our best effort to provide the highest quality products with an appropriate price in order to get customers satisfaction by international perspective.

For more than 80 years history of the company, OKAMURA CO., LTD. has been contributing to the development of industrial world in response to the needs for changing era.

OKAMURA has a power to solve the world wide problem such as water and energy field including transportation and shipbuilding in every society by utilized accumulated technologies and experience.

We will continue to challenge our new business field constantly by enhancing our engineering and procurement capabilities as our company policies "excellent care, punctual delivery and anticipation of the time being.

A smile to accomplishment
An accomplishment into satisfaction
Expand secured future by technology !

Experienced Design Engineering
Accurate Manufacturing
Global Procurement

For further improvement of ;
Quality of products, Customer satisfaction,
and Organizational management

Handling items

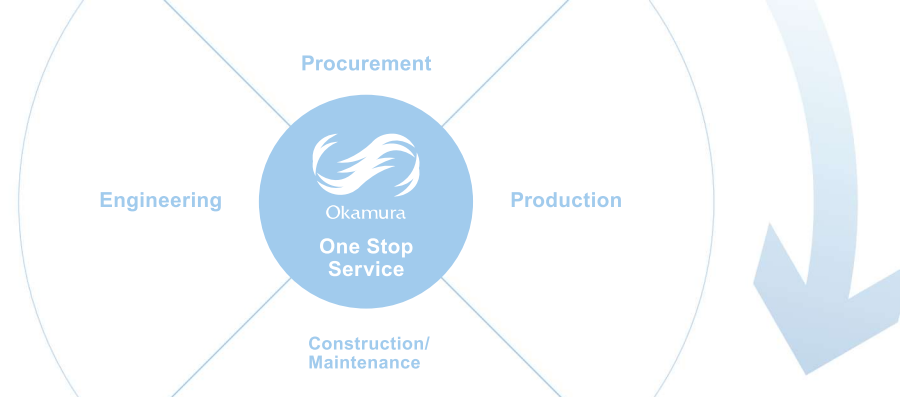

- ▶ Pump
- ▶ Valve
- ▶ Tank
- ▶ Fitting / Flange
- ▶ Various resin piping
- ▶ Various steel pipe
- ▶ Gasket
- ▶ Screw / bolt
- ▶ Filter
- ▶ Bearing
- ▶ Control panel / equipment parts
- ▶ Rotating machine
- ▶ Electrical construction material
- ▶ Measuring equipment
- ▶ Stirrer
- ▶ Pressure vessel
- ▶ Vacuum equipment / Pump
- ▶ Boiler
- ▶ Cooling towers
- ▶ Air compressor
- ▶ Plant equipment
- ▶ Heat exchanger
- ▶ Crane / Lifting machine
- ▶ Transformer / Rectifier
- ▶ Space / Aviation equipment
- ▶ Part production by precision machining

ONE STOP SERVICE

ALL POWERS ARE FOR CLIENT

OKAMURA CO., LTD. has established the present framework to satisfy the needs of client by enhancing the POWERS of ENGINEERING, PROCUREMENT, MANUFACTURING, INSTALLATION and MAINTENANCE.

OKAMURA creates the synergy effect that enables the highest quality products to be supplied at the optimal price by interacting with four forces within the company.

Engineering

In the field of plant (nuclear power, thermal power, chemical, environmental, water treatment etc), OKAMURA provides total engineering from basic plan design ~ detailed design ~ Commissioning based on abundant experience and practical accomplishment.

Plant design

Engineering of thermal power plant and water treatment equipment

- Process design, equipment design, and electrical design of Chlorine injection equipment and removal equipment
- Sea Water Electro Chlorination system
- Salt Electro Chlorination system
- Intake system
- Process design, mechanical design, and electrical design for chemicals treatment
- Cable tray
- Cable support
- Bus duct
- Process design, equipment design, and electrical design of Ancillary equipment such as Water quality analysis equipment

Piping design

Piping Engineering

- 3D CAD
- Planning design
- Detailed piping design and support design
- Analysis of heat stress and surge

Equipment design

Development design of maintenance apparatus of nuclear power plant and thermal power plant Development engineering and design of industrial equipment and machinery

- Design and manufacture for specific applications
- Review and design according to the basic design concept of the ordering
- On-site operation of equipment and apparatus. Maintenance of equipment and apparatus to bring back it.

Electrical control design

Design of grasping all over plant

- Designed for each PLC, design of various control panels

other

Other products

- Parts of equipment
- Rotating machine
- Measuring apparatus
- Stirring device
- Crane / Lifting equipment
- Various condensers

Procurement

We can select suppliers according to site location by global partners. We have provided the most affordable proposal and the best mix reflecting the country risk and features.

- Equipments and materials for power plant
- Heat exchanger
- Boiler
- Various resin piping (FRP, HDPE, ABS), resin apparatus (FRP strainer tank, Duplex stainless valve, ball valve)
- Various measuring instruments

Production

We will support to processing in a wide range of fields from equipment related to power plant (nuclear / thermal) project to water treatment apparatus / parts.

- Precision machining
- Can manufacturing
- Production of control panel
- Wiring work
- Water treatment apparatus
- Production of various connection cables
- Prefabrication piping
- Skidding

Construction/ Maintenance

We will support to disassembly/inspection/assembly of various equipment for regularly inspection of power station and repair work, and assembly adjustment ~ installation ~ test operation of industrial machines.

- Installation work at nuclear/ thermal power plants and various water treatment plants
- Maintenance work
- Public water treatment facility
- Piping device in power plant
- Plumbing, Machine and Equipment installation, Electrical

OKAMURA's Global Network of Operations

As the water treatment engineering company, OKAMURA provides design, assembly, installation, commissioning, prefabrication and site assembly work of chemical injection device mainly for chlorine disinfection system. In addition, we support to improving the water environment, including the manufacture and sale of Jokaso (Waste water treatment system which is originated from Japan).

- Main business**
- Design, construction / installation, commissioning, maintenance of water treatment equipment such as chlorine disinfection system.
 - Design, manufacture, sale, construction / installation, maintenance of environmental low-load advanced Jokaso
 - After-sales service of delivered equipment
 - Prefabricated and field assembly work of resin piping include FRP, HDPE, etc.,
 - Sales of general industrial machinery, parts and materials

OVERVIEW OF OKAMURA CO.,LTD.

INAUGURATION	August,1933	Permits and License	<ul style="list-style-type: none"> • ISO9001 · 2008 • Contractor License (License No.26471 by Minister of Land, Infrastructure, Transport and Tourism) 1. Plumbing business 2. Machine and Equipment installation business 3. Electrical engineering business • Permission of Worker Dispatch Business(Dispatch 28-301447)
CAPITAL	JPY 100,000,000.		
Employee number	70

HISTORY AND DEVELOPMENT OF THE COMPANY

▼ 1950

Expanding operations in the shipbuilding field

Started manufacturing and sale of equipment for ships in wide range from passenger ships to contract vessels.

▼ 1970

Step forward in the field of energy

Started manufacturing and sale of equipment for power plant and manufacturing equipment

▼ 1980

Step forward in the field of nuclear power

Started manufacturing and developing of maintenance equipment for nuclear power plant

▼ 1990

Dealing with Vacuum apparatus and Space field

Besides manufacturing of superconductivity accelerator equipment and propeller for superconducting ships, started development for manufacturing of rocket launching facilities and apparatuses for mounting on Space Shuttle.

▼ 2000

Started business in water treatment and desalination system

At the present stage, OKAMURA is contributing to installation of power plant in all over the world by design engineering for disinfection system of cooling water in thermal and nuclear power plant.
 In addition, based on the experience of design for cooling water disinfection system, we are engineering in sewage water treatment and desalination plant by using membrane filter.

▼ 2010

Started overseas operation at full power

By increasing business for overseas project, we started overseas operation at full power and then firstly established a local incorporated company in Thailand. We will be able to contribute the infrastructure development in many countries to make full use of technologies obtained by power plant, desalination plant and water treatment technologies.
